Model update
(one element)
Classify the update
(Table 1)
World-local, w ∉ B
Keep exact values and bounds unchanged
(Lemma 1, locality)
Tightening
Old values → lower bounds (Lemma 2)
Untouched sub-policies remain exact (Lemma 3),
checked eagerly or lazily; structural cases proposed
Cost decrease by δ
Old values − δ → lower bounds
(Lemma 4)
Outcome change /
other loosening
Discard affected entries
(no general certificate exists: Section 5)
established
contains the proposed element
no certificate
Replay old policy → root budget (Lemma 5)
Bounded search (Lemma 7) → exact new value V′
